We are looking for a Xamarin developer for Casambi in Leppävaara, Espoo – illuminate your future career with us

Casambi is the leader in modern wireless lighting control solutions based on Bluetooth Low Energy. Key aspects of the Casambi solution are great user experience, high performance, and scalability from basic individual fixture controls to industrial-scale solutions with cloud-based remote control, monitoring, and data logging.

Content of the work

The work includes both firmware and application development related to the solutions offered by Casambi. Using Xamarin, you are responsible for developing mobile applications for Casambi products and production line tools, as well as developing a test system for Casambi software. You will design and develop features for new mobile applications that require cross-platform development for Casambi firmware, such as mobile applications, gateways, back-end systems, and web application interfaces. You will use your problem-solving skills to get high-quality, optimized solutions that last and meet the requirements of our customers and stakeholders. You support the internal product support team and customer relationship developers with your knowledge of the system, as well as supporting the company's growing technology base with documentation and testing. You will also work closely with other development, support teams, and management to accelerate the company's technological growth, as well as with our customers to analyze and solve integration issues.

Needed experience

You have experience developing mobile applications by using Xamarin or alternatively have several years of C# and .NET experience – and you are eager to learn more. You will be able to work in an agile environment, and you will be happy to challenge and innovate how our solutions could be better in the future.

We hope you have
- Experience in developing mobile applications using Xamarin
- Experience publishing one or more Xamarin mobile applications
- Strong knowledge and experience of C # and .NET environments
- High-quality standards and a strong desire to develop
- Ability to work independently in complex tasks
- Fluent in English

• Ability to produce high-quality models and implementations
• Good communication skills

Join the Casambi team

As an internationally growing high-tech company, Casambi offers interesting and varied challenges. The work tasks are extensive within a small company so that you will see your own handprint in the completed and updated applications and software.

Casambi is changing the way people illuminate their surroundings. The company's innovative wireless technology uses Bluetooth Low Energy to put the entire lighting ecosystem in the hands of the user. This unique dynamic and reliable modular solution have already been enjoyed in thousands of buildings across hundreds of major networks worldwide. In addition, we have built a significant sales and support network throughout Europe, North America, and Asia, which will continue to grow as companies worldwide discover the benefits of wireless lighting management.

Casambi is an agile company where you get to be part of a team that will develop their own products. Though work takes place at the Espoo HQ, the company has a very flexible attitude towards remote working as well. Casambi invests in the well-being of its employees by providing comprehensive employee benefits and occupational health care. Our office is located within an extensive public transport system.
