

We are looking for a Visual / UI Designer for Casambi in Leppävaara, Espoo – illuminate your future career with us

Casambi Technologies is the leader in modern wireless lighting control solutions based on Bluetooth Low Energy. Key aspects of the Casambi solution are great user experience, high performance, and scalability from basic individual fixture controls to industrial-scale solutions with cloud-based remote control, monitoring, and data logging.

Content of the work

We are looking for a multi-talented, energetic Visual/UI/UX Designer to join our fast-growing design/engineering team in Espoo.

You'll be an important part of the whole end-to-end design process in designing digital products for international customers in B2B and B2C markets. You will create UI designs and UX concepts daily and help developers implement new features for our applications. In collaboration with our product owners, you will also participate in further requirements management to ensure design ideas are implemented effectively, from sketches to production.

Your day-to-day responsibilities will include, for example:

- Creating visual design for our Windows, iOS, and Android applications and Web
- Creating UX concepts and prototypes to materialize your ideas fast
- Designing beautiful and usable user interfaces to desktop and mobile devices
- Documenting the designs clearly for our developers and ensuring the quality of the implemented user experiences
- Creating, extending, and keeping up our design system
- Identifying and understanding the challenges our customers are facing
- Participating in product and requirement management, and UX research
- Active communication with internal and external stakeholders
- Co-operating closely with colleagues in design and development

Experience and skills we are looking for:

- A creative and open mindset with a passion for creating user-friendly, highly usable experiences
- Excellent visual design skills
- Excellent communication and teamwork skills

- Good knowledge of modern design tools like Adobe CC
- A good understanding of UI conventions and concepts in PC and mobile environments (Windows, macOS, iOS, Android, Web)
- Strong experience in visual and UI design for desktop and mobile platforms
- Experience in conceptualizing possible solutions by creating wireframes and prototypes and presenting them to various stakeholders
- Ability to write clear specifications in English
- Fluent written and spoken English

Join the Casambi team

As an internationally growing high-tech company, Casambi offers interesting and varied challenges. The work tasks are extensive within a small company so that you will see your own handprint in the completed and updated applications and software.

Casambi is changing the way people illuminate their surroundings. The company's innovative wireless technology uses Bluetooth Low Energy to put the entire lighting ecosystem in the hands of the user. This unique dynamic and reliable modular solution have already been enjoyed in thousands of buildings across hundreds of major networks worldwide. In addition, we have built a significant sales and support network throughout Europe, North America, and Asia, which will continue to grow as companies worldwide discover the benefits of wireless lighting management.

Casambi is an agile company where you get to be part of a team that will develop their own products. The company is very flexible, and the work takes place mainly at the Leppävaara, Espoo office and, according to the agreement, remotely. Casambi invests in the well-being of its employees by providing comprehensive employee benefits and occupational health care. Our office is located within an extensive public transport system.
