

We are looking for a Certification Engineer for Casambi in Leppävaara, Espoo – illuminate your future career with us

Casambi Technologies is the leader in modern wireless lighting control solutions based on Bluetooth Low Energy. Key aspects of the Casambi solution are great user experience, high performance, and scalability from basic individual fixture controls to industrial-scale solutions with cloud-based remote control, monitoring, and data logging.

We now have an open position for a multi-talented, energetic Certification Engineer to join our fast-growing engineering team.

Content of the work

Tasks include taking care of the certification process and communicating with certification laboratories, preparing required technical documentation together with the hardware team, working on RF and electrical measurements to verify proper operation of our own and our customer's products, and generally keep up to date with current and forthcoming authoritative requirements. Additionally, you will prepare technical documentation and instructions to help our customers easily adapt Casambi products to their products.

Experience and skills we are looking for:

- Being familiar with certification practices like RED, UL, FCC, LVD, EMC, UKCA, CB-scheme.
- Component and end-product certification in EU & USA + Canada, other areas is a bonus.
- Being familiar with general and safety requirements like EN 61347 and IEC 60669.
- Being familiar with directives and compliances like RoHS, Reach, WEEE, and Conflict minerals.
- Ability to write clear specifications and technical documentation in English.
- Fluent written and spoken English.

Additionally, the position offers tasks in process creation and/or in operations as a product specialist.

Join the Casambi team

As an internationally growing high-tech company, Casambi offers interesting and varied challenges. The work tasks are extensive within a small company so that you will see your own handprint in the completed and updated applications and software.

Casambi is changing the way people illuminate their surroundings. The company's innovative wireless technology uses Bluetooth Low Energy to put the entire lighting ecosystem in the hands of the user. This unique dynamic and reliable modular solution have already been enjoyed in thousands of buildings across hundreds of major networks worldwide. In addition, we have built a significant sales and support network throughout Europe, North America, and Asia, which will continue to grow as companies worldwide discover the benefits of wireless lighting management.

Casambi is an agile company where you get to be part of a team that will develop their own products. Work takes place mainly at the Leppävaara, Espoo office and, according to the agreement, remotely. Casambi invests in the well-being of its employees by providing comprehensive employee benefits and occupational health care. Our office is located within an extensive public transport system.
