

Customised Training

Flexible meets functional. Discover the power of tailor-made training!

Overview

Customized training can be highly beneficial in addressing the specific needs of you & your organisation in the most cost-effective manner. Our custom training possibilities provide personalized instruction from one or more Casambi specialists, either at your own facilities, at a Casambi office in Finland, US or Singapore, or at any location of your choosing.

Our training can range from quick start guidance through to deep dives into Casambi products, apps & even education to assist your team with integration or project designs.

The dedicated Casambi Training Team can work with you to create training designed & delivered according to your specific requests & budget.

Our specialists can train various group sizes. Inperson training will likely consist of a combination of theory, “hands-on” practical tasks, & in-depth discussions around the key topics to ensure your questions are answered.

Benefits

- Personalised, addressing your specific requirements
- Interactive & engaging to promote learning
- Time & cost efficient
- Delivered to suit you

We train primarily about Casambi’s own native hardware, software & integration tools. Where possible, we strive to offer insights into various Ecosystem partner products & other lighting related subjects to the best of our ability.

Training fees depend on location, duration, the number of Casambi specialists involved, & preparation required.

Our ability to deliver any custom training is dependent on resource availability.

First, study at your own pace

Our on-demand, & pre-registration online self-study courses are the primary starting point for developing your Casambi knowledge. Access the on-demand material as often as you wish. Enrol for the Advanced course to gain more insight. After this, if you still want to know more, contact us.

Self-study courses are designed to reduce the need to repeat the more common topics during a custom training, & thus reduce time & costs.

Pre-defined “packages”

Casambi can provide ready-defined courses either at our own facilities or at your location.

- **Fundamentals (1-day):**
 - ▶ Participants will learn about Casambi’s wireless mesh solution & how to deploy a single Casambi network utilising basic functionality.
- **Enhanced (2-days):**
 - ▶ In addition to learning about the Casambi Mesh solution, participants receive thorough instruction into all capabilities of the original Casambi app. . No practical programming included.
- **Practical programming using the original Casambi app (1-day):**
 - ▶ Multiple, instructor supported, practical exercises using Casambi’s training hardware enable you to
 - ▶ familiarise yourself with Casambi programming. Usually combined with the Enhanced package

4C (Casambi Commissioning Competence Certification) assessments are also possible to arrange.

Investigate custom training possibilities

Every request is different, so the duration & possible costs associated with a custom offer can vary depending on the final agreed content & practicalities involved.

Simply contact us at “training@casambi.com”, provide details of your training requirements & we’ll review your request & get back to you.
